

SMART SOLUTIONS FOR BETTER ROI.

Flexible. Modular. Scalable. Sustainable. Solutions from ESI result in a maximum return on investment over your system's entire life cycle.

- HVAC controls
- Lighting controls
- System integration
- Network design
- Multi-vendor integrations
- Commissioning services
- Custom applications
- LEED certification

Intelligently Applied Technology. Optimized Building Performance.

Connection. Communication. Control.

All are vital to maximizing building operational efficiency, sustainability and profitability. ESI (Environmental Systems, Inc.) is an industry leader in open systems design and integration and an expert in integrating legacy and/or proprietary control systems, regardless of manufacturer. We focus on delivering solutions, not just products. Solutions that improve comfort, save energy, adapt to change and reduce your operational costs.

Building Solutions. Building Performance.

ESI ADVANTAGES

- A single source for design, engineering, installation, commissioning and systems validation
- Extensive experience in all facets of controls, systems and

applications, particularly open system technologies including BACnet and LonWorks

- A true systems integrator capable of providing best-of-breed solutions that are best suited to achieving your strategic goals

- With best practices in engineering, design, construction commissioning and operations, we draw from proven processes to create robust solutions that fully embrace your current and future needs
