

Continually Learning. Continually Improving.

Knowledge. Skills.

These are the greatest assets ESI (Environmental Systems, Inc.) has. ESU (Environmental Systems University) creates a workplace environment that fosters innovation and creativity through continual learning. It ensures that our employees evolve along with changing technology and business needs in order to consistently provide you with superior services. ESU also can help you to better understand your systems and building. Education is tailored to your specific requirements and to help you improve efficiency and sustainability, while reducing operating costs.

A CORPORATE LEARNING INITIATIVE.

The value we place on education has helped ESI build one of the industry's most talented teams. ESU expands that commitment even further. ESU fosters a culture of continuous improvement and individual and organizational effectiveness. It focuses on:

- Developing and educating employees, customers and business partners
- Continuous learning
- Professional growth
- Continuous improvement of business systems and process
- Promoting innovation

Building Solutions. Building Performance.

ESI ADVANTAGES

- Professionals trained in the latest and emerging technologies and with a solid understanding of how to effectively implement them
- Best practices shared across our organization and with our strategic partners
- Education that helps your business evolve along with changing technology and business needs
- Ability to assess your employees' current state of readiness and create individual learning plans that match your goals and requirements
- A workplace environment that attracts and retains top-quality people interested in continual improvement
