

**LOCAL. REGIONAL.
NATIONAL.
ONE RELIABLE SOURCE.**

For one facility or hundreds. From stand-alone components to enterprise-wide integrated solutions. ESI customizes performance-building solutions for:

- Control and automation systems
- System integration
- Networking
- Security
- Life safety
- Building operations
- Software applications
- Energy services

Intelligent. Integrated. Solutions for Building Performance.

Multi-faceted expertise. Best-in-class technology.

Plus, a proactive perspective that helps you more strategically manage your facilities. That's what sets ESI (Environmental Systems, Inc.) apart from our competitors. With on-going, in-depth education, we master new and emerging technology for controls, automation and system integration and apply our knowledge for optimum effectiveness. Through our consultative approach, innovative designs and expert engineering, we help:

- Reduce costs
- Improve business processes
- Minimize energy consumption
- Increase sustainability
- Optimize information management
- Enhance comfort, environmental quality and safety
- Provide a competitive edge, now and into the future

Building Solutions. Building Performance.

ESI ADVANTAGES

- Broad expertise in design, engineering and service
- Best-in-class technology and a talented, multi-disciplinary team with the knowledge to make the most of it
- Experience gained from over 20 years of delivering results
- Confidence from working with a stable, growing organization
- A reputation for honesty, fairness and quality work
- As a technology independent provider, we draw from a wealth of technology and integration options to create the best open solution for your facility
- Capabilities, resources and experience to execute projects on a national, regional and local scale
